

Across:

- 2. molecule entered bacterial cells and formed a pellet in Hershey and Chase experiment
- 9. molecule that changes R strain to S
- 11. intensely stained parts within the nucleus

Down:

- 1. when is used, transformation occurs in Avery's experiment
- 3. a phosphorous rich molecule found in the nucleolus of cells
- 4. the model organism of Griffith's experiment
- 5. the model organism of Hershey and Chase experiment
- 6. nucleus stained parts that are equal in sperms and in eggs
- 7. radioactive sulfur labeled molecule in Hershey and Chase experiment
- 8. when is used, no transformation occurs in Avery's experiment
- 10. when is used, transformation occurs in Avery's experiment
