Course Overview

Course Description:

This course is offered by CGS to students enrolled in various graduate programs. This course aims to instruct and train students in scientific writing and presentations. Topics that will be covered include different types of scientific publications, scientific presentations (manuscripts, oral and poster presentations), research proposal preparation and writing, thesis writing including experimental design and data analysis, citations and references, and ethical issues including plagiarism.

Course Credits: 3 (3-0-3): 36-40 hours
